

CLASHPOINT

Checks product-team decisions against recorded facts during meetings.

TEAM NAME

Team ClashPoint

THEME

AI for Workplace Productivity

PROBLEM STATEMENT

Detecting Conflicting Decisions During Product Meetings

PS CATEGORY

Software

**WORKING
PROTOTYPE**

IDEA / PROPOSED SOLUTION

CONTEXT-AWARE

Resolves short replies

TRACEABLE

Exact stored evidence

PROPORTIONATE

Warnings vs conflicts

HUMAN-CONTROLLED

Inspect or dismiss

Example uses seeded demo data.

TECHNICAL APPROACH

BROWSER

Next.js · React · TypeScript

Script · Typed turn · Browser speech

Final turn + up to 8 recent turns

POST /api/analyze-turn · Zod

OPTIONAL GEMINI

Unfamiliar phrasing only · disabled by default

SERVER

RESOLVE EVENT

Deterministic conversation rules

DECISION GATE

Ignore · Quiet · Immediate

FILTER + RETRIEVE

Principal permissions · Active facts

CHECK CONFLICTS

Status · dependency · capacity

VERIFY EVIDENCE

Known fact IDs · exact quotes

RETURN CARD

Warning / conflict · safer wording

IGNORE → terminate without collision check

SERVER FIXTURE STORE

GitHub · Notion · Capacity policy
Seeded data · no database

FEASIBILITY AND VIABILITY

WORKING TODAY

Local demo without Gemini credentials
Script, manual input, and evidence
inspection

41

AUTOMATED TESTS
PASSING

27/27

FROZEN DEMO CASES
PASSING

*Development fixtures — not an independent
benchmark or real-world accuracy claim.*

RISK → RESPONSE

RISK	RESPONSE
Browser speech unavailable	Use script or manual input
Ambiguous language	Leave short references unresolved
Delayed responses	Cancel stale work on Pause, Stop, or Reset
Limited source coverage	Label fixtures and show exact evidence

Live microphone rehearsal remains pending.

IMPACT AND BENEFITS

WITHOUT A SOURCE CHECK

“Promise Feature X by Friday.”

The commitment proceeds without checking the recorded approval requirement.

WITH CLASHPOINT

The promise triggers an evidence-backed conflict.

“Do not proceed with Feature X until the DPA update is approved.”

SUGGESTED RESPONSE

“We’re targeting Friday, pending final Legal approval.”

PRODUCT LEAD

Qualify the customer commitment

ENGINEERING LEAD

Review blockers and workload

APPROVAL OWNER

Make prerequisites visible

Illustrative scenario. Intended benefits; no measured business impact yet.

RESEARCH AND REFERENCES

PURPOSE	REFERENCE	RELEVANCE
Conversation design	Clark & Brennan, Grounding in Communication (1991)	Conceptual background on conversational grounding
Browser input	MDN, SpeechRecognition	Browser support and recognition-service limitations
Server architecture	Next.js, Route Handlers	Request handling used by the prototype
Prototype evidence	ClashPoint repository, commit d3db372	Implementation, fixtures, and automated tests

*Prototype evidence uses development fixtures. Business benefits have not been measured in a pilot.
Repository link is private and is not a public judge demo.*
